

2017 GlassBuild "Show Special"

Visit the Diamut Booth 3037
at GlassBuild in Atlanta from Sept. 12-14
and receive **10% off** any purchase
of the new KCX line of core drills!

Diamut's new core KCX drill line delivers high-quality performance and consistent market value!

Diamut's new KCX line of core drills increases the cutting performance of drill processes on all vertical and horizontal CNCs as well as semi-automatic machines. Diamut's new core drill line comes in 75mm and 95mm lengths with diameters from 5mm to 60mm. Other top product features include: less friction between the drill and glass; less blowout outbound of the hole; two precision cuts that last the life of the drill; a steel body that minimizes the appearance of rust; better flushing of processing residue between glass and drill along with improved feed rates due to bond and crown design.
